Thanks for the note, Steve. Been thinking of you too. Pete Maisel has been wondering what work you have on, of course. I told him to give you a call but I don't know that he will.

One of the things I've been thinking about is if I could be of help with consistent monitoring for R&B. I would love to and have talked some with Brent about that. Keep it in mind if you don't need an EPA contractor to do it. Totally understand if you do.

I was happy to see the town/county articulate their thoughts so well on paper to EPA. While this is not so good for you guys and may have a longterm effect on trust between parties, I think it will really increase communication (or should) without ARSG in the middle. It was also published in the Silverton Standard last week.

See you in May when you can expect to see a big, whale-like Lisa. Hope you are doing well with your other projects. I'm sure you are!

Lisa

I hope you are well. I'll look forward to seeing you in May – at least the 27th if not before. I had considered coming down to do a quick recon on the ground between R n B and Gold King but more snow last week down there may have negated that.

Talk with you soon.

Steve
